

# shadcn/ui

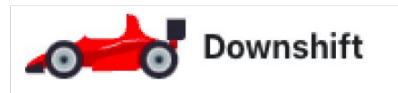

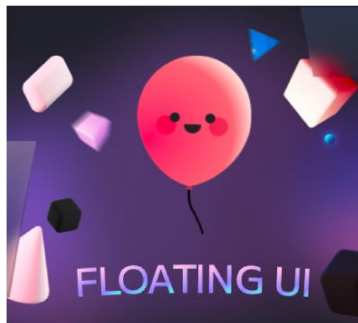

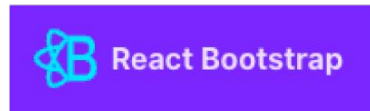

Nir Tamir

# Nir Tamir

- Senior Frontend developer
- Works at Youleap
- Loves open source and tooling
- <https://nirtamir.com>

## Styles

Utility-first CSS (Tailwind)

CSS classes with styles (Bootstrap)

CSS Tricks to do interactivity (Daisy-UI)

Pre Made Design System UI (MUI)

## Functionality State

⇒ Headless UI

→ State Machine (zag)

→ Inject props (react-aria)

→ Components (radix-ui)

Specific case ui utils (floating-ui)

# Styled UI

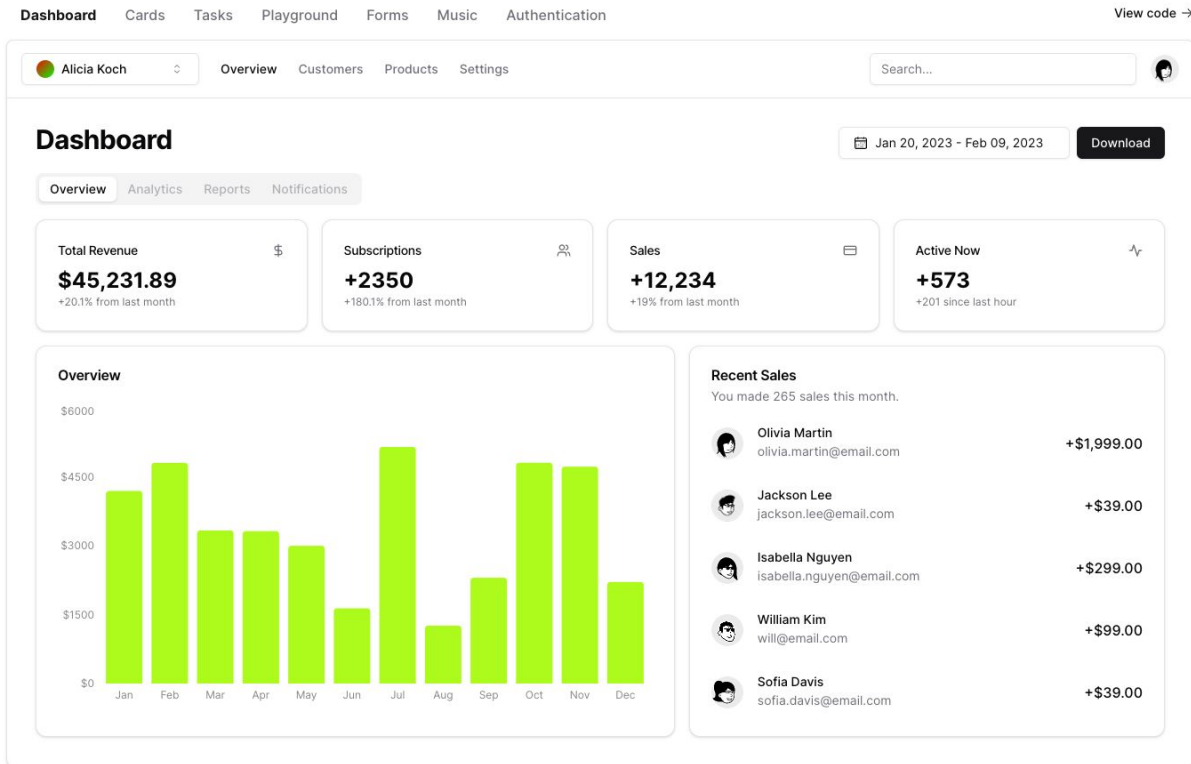

- Looks good
- But you lack a lot of control
- [mui](#)

# Headless UI

- Accessibility (a11y)
- Primitive
- Control
- But you need to style it yourself
- [radix-ui](#)

# This is **NOT** a component library

It's a collection of re-usable components that you can copy and paste into your apps.

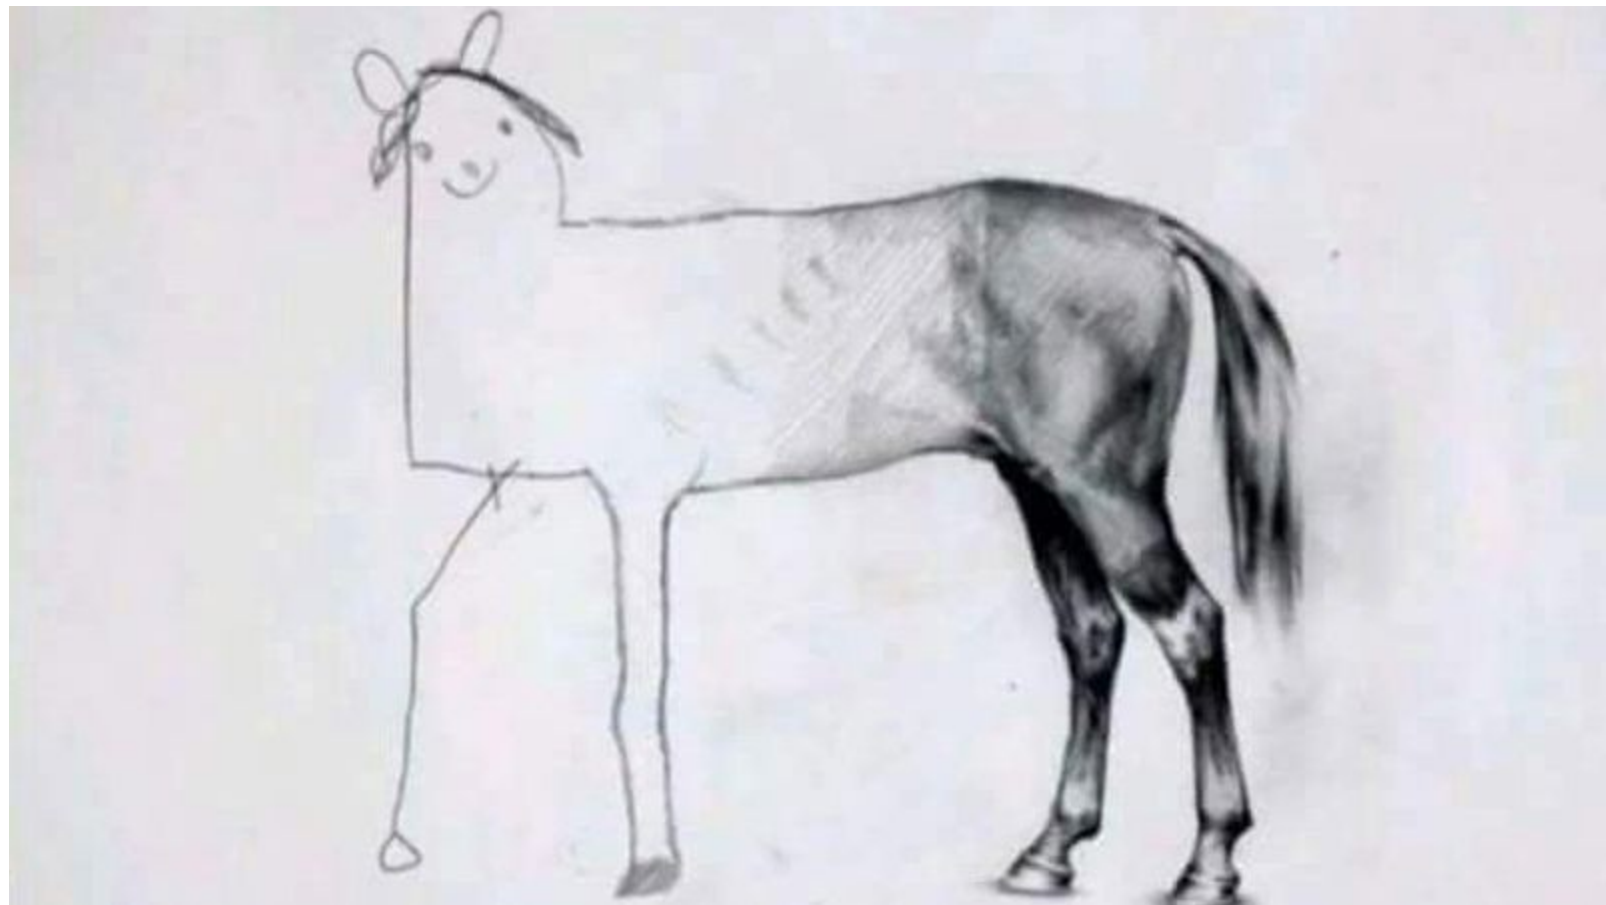

Lets build out App

# Themes

- Colors
- Dark

# Final App

- [Deployed URL](#)
- [GitHub shadcn-meetup-demo](#)

# Not just react

- [shadcn-solid](#)
- [shadcn-svelte](#)
- [park-ui](#) - ark-ui and pandacss
